Comments: Such a development will impact the quality of the recreation experience for Montanan's as well be a negative impact to the wildlife and aquatic resources of the area. Before any project is green lighted there needs to be a through environmental impact study to clarify the project impact on endangered wildlife species and the water quality impact of such a project on Holland Lake and fishery. Also there needs to be a look at the impact on low- and moderate-income Montanans ability to access and enjoy the areas recreation assets.

We don't need another rich person's hideout in Montana. We need to start looking out for Montanans ability to use and enjoy the areas we love and live here for.
