Title:

Comments: National Forest is just that. It is the nation's. By leasing land to a private, for-profit corporation you are eliminating well loved recreation areas for the general public. This beautiful lake should be preserved for ALL to enjoy. As our population grows there are already too many places being eaten up by these very companies doing this very thing. Why should we have one more place that excludes the regular person from enjoying because a few people have an exorbitant amount of money. PLEASE LEAVE MONTANA THE LAST BEST PLACE!
