Title:

Comments: Hello. My children are 5th generation Montanans. I have questions of concern with this development and would like more info. The Lodge is Historic to Montana and tearing that down will erase that history that our children should have. Once it is gone, it is gone forever. It is a beautiful lodge. Rich with Montana History. From the building itself to the decades of Montanans who have been in it.

What will the 30 plus structures be used for, and how large will they be? Will there be pollution to the land, air, visual, and Lake water over short or long term? If septs are required, will they be testing the water often for pollution? How large will the New lodge be? How much forrest will be removed to accommodate all of this?

How big will the parking lot be?

Thank you for your consideration.
