Comments: Hello,

Montana is currently in a growth crisis. Big out of state money is bringing the rich and want to be outdoorsy instagram famous, and it is doing nothing to actually improve the beautiful state of Montana, nor the lives of the people who live here. Instead, big out of state money is coming in and destroying the beautiful nature that our whole world is quickly trashing and ruining. One of the biggest struggles in the world is depression and anxiety, and nature is something that is proven to help people who struggle with that. These plans will only destroy nature, and destroy chances of seeking refuge amongst the serene and secluded lake Holland. POWRS is an out of state business, with plans to develop thousands of square feet of land at Holland lake. This will do nothing to improve Montana, as the plans will (guaranteed) only provide minimum wage (or slightly better but not livable wages) to the Montanans that they employ, and yet they will bring thousands of outsiders year after year who want to fake be outdoorsy and ruin the beautiful hidden treasure of Holland lake. Please stand up to the big out of state money that doesn't care for the state, the people residing in the state, or the nature that our world desperately needs. Do what is right, do what is needed. Don't give in to big money who care for no one or nothing other than their pocket book.
