Comments: Are you kidding me! Leave this pristine piece of Montana alone! You will RUIN the area. I was born and raised in Montana and due to financial reasons my parents moved our family to California..YUK! I will have to say, California is a love/hate relationship. Obviously, you can't beat the weather & financial opportunity, but the CRAZY crowding, traffic, and insane politics has driven a lot of Californians out of here. I have been going back to my roots (Montana) for years to escape this craziness to find solace on the rivers, streams, mountains and vast prairie land to fish, hunt, and simple ESCAPE the crowds. I have seen the influx of "rich" people wanting a slice of heaven and honestly, who can blame them. Come visit, perhaps buy some property, but let's have some BALANCE! This project is TOO Much! Thank God for men like Teddy Roosevelt that preserved the National Parks or we would have DEVELOPERS ruining those areas as well. STOP the Madness!!
