Comments: Forest Service: Caring for the land and serving people. How is this accomplishing either? Maybe the slogan should be changed to "Raping the Land and Serving the Wealthy."

It's heartbreaking to think this beautiful place will become one more area in our state that is off limits to the average, caring people of Montana. When will the powers-that-be cease their catering to the wealthy? When will they put the families of Montana first? The families who want to enjoy the natural beauty and recreational qualities of our state in simple and affordable ways. When did 30k sq.ft. "cabins" replace tents and campers? Why can't nature be enjoyed simply and, dare I say it, naturally? Why is the exploitation of Big Sky Country allowed to continue? It is truly becoming impossible to not develop the "us vs. them" mindset and that weakens all of us.

Please don't allow that to happen. No More Playgrounds For The Wealthy!
