Comments: The restoration and expansion of Holland Lake Lodge is an important part of the Seeley Lake economy and the people who live and work there. I support efforts to restore this historic lodge that is in need of serious care after years of neglect. I also support improvements and expansions to the lodge for the benefit of recreationists and tourists living in Montana and those coming for elsewhere. As a fiscal conservative, I do not want this project to balloon into billions of dollars but would like it to be a reasonable construction project within the scope of the project set out by guidelines the U.S. Forest Service as established. I do not want this lodge to be torn down.
