Title:

Comments: This is a horrible plan and i cannot understand why any proud Montanan would support such a development on our special and remote spaces. Especially without proper environmental impact statement!!!

How are you going to know how this can affect the water, the loons, the trees, all the rest of the wildlife? Why must everything get over developed?

How will you handle the noise pollution from the motor boats?

How are you handle traffic on a very remote highway with limited cell and emergency services?
