Comments: I feel incredible disappointed that the first service is considering developing the Holland lake area. The Swan Valley in general, and Holland lake in particular are extraordinary special places that bring multiple amazing wilderness areas into close and easy proximity of the public. The quick and easy access to all sorts of recreation opportunities are immense in this area. Despite the high level of recreation happening, this area is so special because it still feels wild. And it feels that way because it is wild. You are just as likely to see a camper crossing the road as a bear or moose. That is special, that is what makes Montana special, and that is what montanas care about. Please do not allow more development of the Holland Lake area. It would be a grave mistake. Thank you.
