Comments: I do not believe that Holland lake would be improved by commercializing the area with homes, larger buildings, ect. One of the most intriguing things about Holland lake is the wild feeling it has when you don't see buildings, boats, ect. Growth of this place in facilities or infrastructure would more than likely lead to decrease in animal populations, camping available for people and families in the summer, and overall a lack of freedom to "get away" at Holland lake.

Please keep this place wild, unpopulated, and beautiful.

Please consider animal populations, the change in trails and usage over the summers, and the increased pollution from cars, houses, ect.
