Comments: "Pave paradise, put up a parking lot"...

The impact that this project will have on the natural beauty and serenity of Holland Lake will be something we can't "undo". Not to mention the increased traffic on the roads and trails, disruption of wildlife, plants and water ecosystems.

Seriously? The wealthy out of staters who will be the only ones enjoying this new man made "attraction" have enough other "high priced tourist attraction get-a-ways....please leave Holland Lake as it is for people who enjoy the simplicity of nature without all the "frills".

A project this size would be detrimental to not just Holland Lake but the surrounding areas by way of increased road traffic and maintenance, lack of workers, etc. just because it " can" be done, doesn't mean it "should" be done. Please, don't let it be all about the money in someone else's pocket! I was raised to believe that the Forest Service was here to protect and PRESERVE our natural forests! If you continue to sell out for the sake of money, what precedent are you setting?

Pretty soon there won't be any natural forest left! It will all be a commercialized playground for the wealthy at a price the local citizens can't afford.
