Comments: The "improvement and expansion" of Holland Lake is anything but that. One of the beautiful things about Holland lake is in its simplicity. The view from the falls shows almost no buildings making it look untouched. This lake does need a big development. If this is allowed the building will push out locals because they will no longer be able to afford to stay there. We do not need to commercialize our lands. Holland Lake and the surrounding are should stay as it is. Improvements should be made to the campgrounds and trails, not new buildings. I oppose this project and the voices of the people should be heard.
