Comments: As a former Montanan (lived in Missoula from 2018-2020) I'm devastated to know that Montana and it's pristine beauty is being exploited for the sake of money. To disrupt the wild and natural environments that provide respite for its community members and habitat for so much of the ecosystem, to build commercial space is heartbreaking. Those that see Montana as a money maker entirely dismisses the reason why this state is so great- it is kept wild! Being outside and enjoying its beauty for its natural simplicity is why Montanans live there and keep their families there. Do not grant the commercialization of the Holland Lake area, one of the most beautiful lakes, hiking areas, and mountain views around! Keep recreation areas WILD and corporations OUT!!
