Comments: I'm opposed to the US Forest Service using leased land for resort purposes because the increased use will add pressure on already strained habitat and wildlife. Holland Lake already sees a huge amount of foot traffic. The properties' proximity to Bob Marshall Wilderness Area makes it especially sensitive to high density use. Further, this proposal seems to be way for a big business to extract Montana's most precious resource, it's land,, for the benefit of a smaller segment of our population, the wealthy visitor. Please deny this proposal and solicit proposals for something that benefits all Montana wildlife and actual residents.
