Comments: Hello,

I am completely against this development. I was born in Hamilton, Montana and have lived in the Bitterroot Valley all my life (4 decades). Areas like Holland Lake should be made available for recreation to the general public. Montanan's do not want more of our beautiful land being developed, especially from people/organizations from other states. Projects like these will force the true Montanan's out and bring the outside people in. At the quick rate this is going, Montana will be just like every other state that has been developed. It is losing its authenticity fast. PLEASE, don't approve this project! Keep Montana land available to people that want to enjoy its beauty without being part of a development. There are millions of places we can go if we want that. There are less options available for recreating at places like Holland Lake.
