Comments: The risk of out pricing Montanans and low to middle income people from across our nation from being able to enjoy the beautiful PUBLIC LAND and Holland lake found in Montana is at risk. This decision to not allow this development is critical to help prevent this type of development from happening across the state of Montana, changing the very reason people are drawn to MT. The rugged, undeveloped nature. Please, don't let this happen. Don't let big money have influence over this choice.
