Title:

Comments: The USFS is charged with managing public, taxpayer supported natural assets for the enjoyment and benefit of all while also maintaining the integrity of that asset to the best of their ability. Allowing a large and private corporation to possess these natural assets at Holland Lake, erecting large and forever damaging infrastructure with no guarantees that access will be preserved for all is folly on the part of the USFS and will be one more nail in Montana 's coffin of public access. It will urther accent the divide between the haves and have nots and further tie up the lands that Montanans have shared and enjoyed for a century. Montana has been "found" but it doesn't need to be destroyed by the newcomers because they feel entitled to a premium experience and are greedy enough to force their wants on everyone else. Please do the right thing and keep Montana the last best place for ALL to enjoy... not just the monied people. Thank you for your consideration.
