Comments: Holland Lake is the jewel of the Seeley Swan Valley. The proposed expansion project will destroy the ecosystem and beautiful natural setting we all enjoy. This valley has already been very negatively affected by the influx of people over the last few years; the last thing we need is a reason for more folks to come and ruin it with a corporate presence that simply does not belong here. If an honest environmental assessment is done, I am confident that the project will be scrapped... Holland Lake is too delicate and precious to be commercialized! Please do the right thing and do not approve this heinous expansion. Keep it wild!
