Title:

Comments: Please do not let some large company, especially one NOT from Montana, come onto our land and start tearing it down to create more tourism. Especially tourism for rich people. Don't let them ruin Montana's natural and raw beauty by making the area into more buildings and parking lots. People like Montana because it's a place where they can be and feel real and down to earth. If you start letting companies come in and turn our wild lands into more civilized areas, soon it won't feel like Montana anymore. Don't let Montana get taken over by outsiders who don't have its best interest at heart.
