Title:

Comments: I believe that this project, if approved, will cause harm to the area in many ways. POWDR is known to create very high end, expansive projects that have big footprints, changing regions into large, loud, busy and aimed at attracting only those with high income to enjoy the resorts they are involved in. Holland Lake Resort may need some updating but the current plan changes the character and nature of the area. It will not be a positive for the region. Please go back to the drawing board and reconsider updates, minor improvements etc. Decline large parking lots (parking has never been a problem there). Update cabins while still making them affordable to most. Allow Holland Lake to stay the peaceful, beautiful experience it currently is.
