Comments: I highly recommend not privatizing this land. It's beautiful and should be enjoyed by everyone. I have personally experienced the effect of private developments in my own area and they have had an extremely negative impact on the local community. It's very bad for morale because the message of privatization of land on a large scale is inherently negative. We need the message of community, which includes public parks and access. I don't recommend compromising because there isn't a satisfactory compromise, especially in a case like this. The local communities should have final say. Considering that the purchaser is out of state, local could mean all of the state of Montana.
