Comments: I am totally against this project. It is way too large for the existing area. How will it affect animals in the area? How will it affect recreation in the area? That lake is small and is already used heavily in the summer. More recreation opportunities, less building please. Why does an out of state company need to be used to come up with a plan for a Montana site? I have been enjoying Holland lake for years and cannot imagine the damage this will have on the land, the animals, and the people in the area. Please reconsider this proposal.
