Comments: It is offensive to approve such a development in an area as naturally pristine as this. The citizens of MT and from across the US who come to MT to experience nature at it's grandest and in its most natural state, do not come for man made development. There are numerous other places in MT or in the NW US people can visit if development is what gives them pleasure. Please save the natural environment we have remaining as once it's gone, it is gone forever. If your argument is that it's already developed, let's compare the current to the proposed. The scale is that of a homesteader in the 1800's to the Bellagio casino in Vegas. There is no comparison! All wildlife will disappear except for what stays for an easy meal thus becoming habituated to man and ultimately resulting in its death after a negative encounter with man or his vehicle. The lake will lose any semblance of the peacefulness it has today. Looking at large buildings, cell towers, lights, vehicles and parking lots is not what outdoor enthusiasts find peaceful. Please consider the entire impact this will have on the natural environment and deny this development in its entirety. Decisions like this should not be made based on the economic impact but on the impact to the natural environment and what will be lost forever.
