Comments: There is no way this proposed expansion of the USFS Holland Lake lease land won't result in loss of access for public land use and environmental degradation in this area. Christian and his out-of-state investors want to put in a resort. Do we need another resort on Montana U.S. Forest Service lands? One that benefits only those who can afford the luxury rates to be charged? Christian says this is the only way to make Holland Lake Lodge "financially viable" (Montana Free Press, 9.12.2022). Really? I am skeptical. Next question: financially viable for whom? And why should I want that for this area? Holland Lake sits on the edge of the Bob Marshall Wilderness and is enjoyed by many. This will be a negative impact on multiple fronts. As a 5th generation Montanan, I am not in favor of of this proposal. Sorry Christian. Sorry POWDR. Go make your money off nature somewhere else.
