Title:

Comments: I am against this project. Adding 20,000 SF of buildings and removing trees and historical buildings to pad the pockets of developers on public lands is wrong. This project needs a full Environmental Impact Study to see the effects on the environment, lake, viewshed, traffic, etc.

If this was private ground, I would have no problem, but this is public land and it is wrong for the Forest Service to fast track a project that will forever impact this beautiful, pristine lake. Extend the comment period, have multiple public meetings and do an EIS.
