Comments: I would like to voice my objection to this project. The scope of this project will forever change the landscape of the entire area for the worse and be a detriment to water quality in Holland Lake. This will in turn have an adverse effect on fish including sensitive species such as bull trout and westslope cutthroat trout. A project this size will also have a detrimental effect on wildlife species of which there are many in this area including grizzly, deer, elk, mountain lions, etc. Not only that, this project will include removing many large, mature trees in the area to make room for the additional structures. One last note will be how this project will change the social structure of this area by making it over-crowded with people and noise and light pollution. This is a beautiful, tranquil lake that should remain that way for the entire public, not just folks willing to pay money to visit this resort. The land is for everyone, not just folks with money. I'm asking that you please deny this project. Thank you.
