Comments: Please don't approve this project. 1) the developers are from out-of-state; 2) this proposed development does not belong on this small, pristine, natural lake; & 3) it is way too large & not in keeping with the area. The historical buildings should be preserved, not torn down. Too many historical buildings have been lost in Montana already because of development. A development this size cannot help but have a negative impact on the environment and animals regardless of any "mitigation" efforts. And what possible benefit can there be to the area except to the developers? Whatever benefits could be claimed for the valley are too costly to us Montanans. Please, please, please do not approve.
