Title:

Comments: The development of this area has such a giant negative impact on the communities that surround it, and Montanas integrity as the great state it is at whole. We can not allow this area to become a tourist attraction. Yellowstone, Big Sky, Glacier, and Flathead are almost unaffordable destinations for most locals already due to the giant influx of out of state money, therefor taking away a free and accessible core area of this side of our beautiful state is not only wrong but irresponsible with no disregard to the Montana population.
