Comments: I strenuously object to allowing POWDR to destroy the Holland Lake area. Do not allow their project to go forward. Holland Lake sits on the edge of the Bob Marshall Wilderness. This resort project would contribute to the vast destruction of our wild places all the while turning this revered and historic place into a playground for wealthy out-of-staters. This kind of exploitation of Holland Lake and Montana needs to stop. We need to keep Montana "The Last Best Place"! Don't follow the in the ill-fated footsteps of Whitefish or Big Sky. Consider how they have changed over the years and are now not local friendly. Yellowstone and Glacier National Parks are another example. Allowing these outside entities to come in and change our landscape & culture is definitely not the Montana way!
