Comments: I have been recreating at Holland Lake on and off for over 20 years and greatly appreciate the quiet nature of the lake and lodge area as it currently is. I certainly would support updating or replacing the current small number of cabins so they are built more tightly and to current standards but I do oppose the significant expansion of units that POWDR is proposing. I see no upside for the standard users of the Lake to have more than double the number of cabins on the lodge site or to have a much larger main lodge. I oppose the plan as it currently is proposed.
