Comments: After living in 13 large cities across the United States, I moved to the Swan Valley to escape the chaos and trappings of city life. That was 30 years ago. My family has enjoyed recreating on Holland Lake the entire time. I kayak every Monday morning with a group of women from the valley and we love the quiet, peaceful time together! We also meet once a week to picnic and swim in the beach area

PLEASE DO NOT DESTROY this lovely historical treasure by allowing this development! Keeping the wilderness in tact, will long last any profits made by a big tourist attraction/lodge. People for generations to come have a right to come experience the beauty and serenity this valley offers.

I think a LOT OF IMPACT STUDIES need to be done before any development is approved! Trash, sewer system, highway traffic, increased tourist population, and employees would have to be imported to name a few!

STOP and DO THE IMPACT STUDIES. THEN..... TAKE YOUR RESORT SOMEPLACE ELSE.
