Comments: This situation unfortunately is becoming all too common. Our beautiful state is being bought up and developed. We who live here are being strangled out of campsites, trailheads, and accessibility to the places we love and have taken care of.. He who has the most money wins.. how can this be good for our state or we as local people? What is going to be left for us and our children.. Please consider the effects of this development on Holland Lake and all those who enjoy it now.. Is this just another place bought out by out of state people and money..

How sad for all of us.
