First name: Madi

Last name: Beason

Organization:

Title:

Comments: I believe that by creating this expansion you will be creating a breeding ground for exploitation of the surrounding nature. This expansion will create an influx of individuals from in and out of state, thus causing more road traffic, more people, which leads to more boats in the water and more chances of humans causing damage to nature. All wildlife will be affected. May I point out specifically that Loons will be greatly affected by this. Loons nest on this lake. May I point out the nearby owl creek campground where outfitters camp their trailers and stall their horses or mules. The expansion will push the Montana natives out of this beautiful, peaceful place.

Individuals from all over are welcome here and that's what I love about it, because all of the individuals I have encountered at Holland lake respect what Montanans want and many of these individuals agree with such wants. Expansion of holland lake can lead to disrespect of the land, wildlife and Montanans. It may also lead to the pushing out of the locals who have lived in the area for generations and have had the cabins in their families for generations.
