Comments: To whom it may concern:

I currently reside outside the State of Montana, but I lived there for most of my life (35+ years), and I visit often. Montana is a special place, the "last best place." Unfortunately Montana, like many other special places, has increasingly been taken over by out-of-staters with money and salaries earned out of state, which means that Montanans are no longer able to enjoy many of the most beautiful places in Montana. This project, on forest service land, should not be allowed to take access from this beautiful area away from Montanans and give it to wealthy out-of-staters to enjoy. This is not a good and fair use of federal forest land! Please deny them the ability to lease forest for this project!
