Comments: Hello,

I am writing to you today to OPPOSE the Holland Lake Lodge Expansion Project.

First, interested parties have not had sufficient time to become aware of, evaluate, and provide feedback on the project.

Second, the project includes the felling of trees which are currently sequestering carbon to combat global warming and climate change, which as you know are existential threats to humanity. What will the project do to slow global warming and climate change?

At the very least, an environmental impact study must be performed to consider all the impacts of the project before any work is begun.

Thank you for your time.
