Title:

Comments: We lived in Montana for close to 30 years. Traveled Hwy. 83 many times for work and vacations . We do not understand how a facility this large could even be built here even with a full EIS approval. Use of a Cat. Ex. document, in my opinion, does not even rise to the level of the proposed project and is essentially meaningless. We may not have a vote but we vacation in Montana and do not approve of this project in any form.
