Comments: I wish to comment opposition to the proposed plans for Holland Lake Lodge in Condon, Montana. It will have a huge detrimental impact to the environment in the area. The lodge/hotel/ motel housing 150 occupants alone is ridiculous. This is too fragile of an Echo System to support such a structure. The Historical value of this lodge as well will be forever altered. If Forest Service feels they will benefit by more money for lease fees due to the size of planned expansion I believe the new owners will find a way of writing off their profits each year so they have negative gains. Seems to be the way of large Corporations The drawing card for this lake is it's pristine beauty and primitive surroundings reminding us of "The Last Best Place"! It doesn't need glitter or glamour . It would only detour from The Swan Valley, the Lodge, Holland Lake and It's value as an intimate Tourist Destination. If anything the new owners should go with that concept! It's refreshing!
