Comments: Please help keep this area of Montana as close to its current natural state as possible. Prices and general cost of living has already gone up so much, and the last thing we would want is one of our amazing forests/lakes to become gentrified. I am not against people moving to Montana; I'm no against companies opening/building here. But it shouldn't be at the cost of one of our state's natural resources. Keep the flora and the fauna in mind. This was their home first, we merely share it with them.
