Comments: I'm was born and raised in Montana, please be very cogent when making a decision when you first turn on the road. There are a lot of us out here who like the lake for what it is now. Doing a study of the access, surroundings, and impact will be hard. The trails roads and residents will suffer as will the Forest Service and manpower, septic , water, power and the over use of the lake. I don't feel this pristine lake can take ALL the plans for development without very ill consequences. Please get into your vehicle drive up there and sit at the side of the lake near the Lodge it should come Crystal clear this is not the place. Thanks for your time Dale and April Wilson.
