Comments: Devastating news. People love Montana for the sole reason that it is truly "the last best place". This means that people love all of the states beautiful wide open space. Space for the locals and the tourist to both equally enjoy the beautiful sites. Bringing in large corporations, with money making as their only goal is truly disappointing. It ruins the state. It makes our big wide open state full of suits and greed, taking over the beautiful sites we can freely visit and enjoy.
