Title:

Comments: Holland Lake is a Montana jewel. This lake has a special history of providing amenities for Montana locals. It should be kept from being exploited from a out of state wealthy corporation. This does not fulfill the forest services core values outlined on the USFS website, "We want people to see our agency core values of service, conservation, interdependence, diversity and safety come through in how we work with each other and our communities, tribes and partners." What would Pinchot think?
