Comments: Please do not allow rich out of stater or rich anybody block public lands in Montana by allowing the development of forest service lease grounds. If the development of these grounds provides a better public space to be enjoyed, then I'm all for it. But if it's a corporation or any wealth where the means of their action is to hinder the common Montana resident from accessing and enjoying said cite then I'm against it. The rich out of stater has already restricted enough land in this state and they will continue to do so. They don't need Holland lake as well. If I'm ignorant on the matter please let me know. Thank you.
