Comments: Montana is changing rapidly. Increased population and swift development of our beloved state is deteriorating the quality of life here. The mission of the USDA Forest Service is to "Sustain the health, diversity, and productivity of the Nation's forests and grasslands to meet the needs of present and future generations." You have an opportunity to save this lake from overdevelopment and conserve its habitat for future generations by not allowing the Holland Lake expansion project. The expansion of this property serves no one's need but the developing company. Please be a force in the world that prioritizes the health of our forested environment when all else wants to exploit it.
