Comments: I would like to add my formal comment regarding the Kaniksu Over-Snow Vehicle Use Designation Project

I am firmly in favor of limiting the range and period of use for over snow vehicles as proposed in the plan. As a motorized AND self propelled winter enthusiast, I have seen first hand the destructive nature of motorized sports on our forest lands. With a growing number of motorized enthusiasts, there has never been more conflict between not only the natural flora and fauna but self propelled winter recreation. I believe, without a doubt, that limiting the range and length of of the over snow motorized season in the proposed areas will certainly improve the natural ecosystem and provide an opportunity for truly low impact winter recreation to thrive.

I hope you consider my comment.

Cheers
