Title:

Comments: I strongly disagree with this major development on our national forest lands, on a lake that has been enjoyed for generations for the near-untouched beauty of the area. My wife and I nearly cried when we saw the road to this lake had been paved, fearing for what would happen to the area we got married. To have this place become just another resort location is a disservice to all the people of Montana and ruins another place of natural beauty for the sake of commercialization. Stop exploiting our beloved state for outsiders that don't appreciate our state for what it is.
