Title:

Comments: This is absurd, Montana does not welcome big resorts. The local people can barely afford to live here. The cost of living in western Montana is already high because the rich out of states have driven the prices of living. We are willing to pay a little more to live in such a great place that we can enjoy the peace and serenity of Montana. Locals can barely even reserve a spot at any state campground in the swan valley as it is. This project should not be approved because it will only bring more people and inflation, drowning out the enjoyment of the wild locals have enjoyed for years.
