Comments: I camp here every summer with my family. I am concerned about the additional light pollution from the expansion of the lodge. I assume with expanded use they will have to add additional lighting for safety. One of our favorite things is to view the night sky from the beach with the kids. There is a large light already on the lodge that kind of ruins night viewing. Additional light pollution would be a shame and take away from the experience

What impact will the expanded parking have on boating? Traffic on the gravel road? The lake already has erosion and safety issues from motorized boating. One nice feature of this lake is it is ideal for kayaking , paddle boarding, and swimming due to how clean and clear the water is. It does seem like the lake is big enough to handle more heavy mixed use
