Comments: As stated in this initial proposal, this is a reaction to many people coming in from out of state. I understand that tourism is our states largest source of revenue. However this drastic of a renovation is no longer respecting or preserving the natural sanctity that this place provides. Changing an area with a few rustic cabins into a resort will completely restructure the makeup of this tranquil area. I feel renovatios can be made with facilities added in a way to preserve the dignity of the area.

Please reconsider this overhaul of such a special and unique treasured area.
