Title:

Comments: I am opposed to this project. A resort of that scale will not and does not intend on blending in with the natural environment. If this project is allowed to go forward it will cause catastrophic environmental damage to the surrounding area. If they are allowed new construction I believe very strict limits need set, i.e. only same number of cabins and square footage that already exists, no more. All buildings have to be a color (Brown) that blends in.
