Comments: This would not benefit the public in montana to take an area that is home to both wildlife and humans to let it be viewed and enjoy naturally. The up keep will take away from what people enjoy about montanna and for people who live here. If people can't enjoy what it natural then montana is not for them. It will invite people to visit an area they expect a certain visit that they don't have respect for becuae they feel they deserve these areas for no work for them
